Grand Total	47

Insights / Analysis

The Web Development department has a 100% completion rate, meaning all students completed the internship successfully. The Digital Marketing department has a 75% completion rate, showing most students completed their internship.

The Graphic Designing department has a 50% completion rate, indicating that half of the students completed their internship.

The Cyber Security department has a 25% completion rate, meaning most students did not complete their internship.

The Video Editing department has a 50% completion rate, with half the students completing the internship.

The Data Analyst department has a 50% completion rate, showing half of the students successfully completed.

Mentor Interaction / Overall Observation

Departments with higher completion rates, like Web Development and Digital Marketing, likely had better guidance or mentor support.

Departments with lower completion rates, like Cyber Security, may need more mentor support or training resources.

Overall Conclusion

Overall, Web Development shows perfect performance with 100% completion.

Departments like Cyber Security need more attention to improve student internship completion.

Mentor support and guidance play an important role in internship success.
